### CB-26P Fitting position

Fiat Tipo 1.6 Spi

"Here is another car successfully approved with Ecotek, IMHO.  
More torque, up to 9% in fuel economy and wonderful emission figures:  
CO @ idle=0.00% and @ 2,500RPM=0.07%  
CO+CO2 @ idle=13.73% and @ 2,500RPM=13.60%  
HC emissions @ idle=118ppm and @ 2,500RPM=41ppm"  
*Sergio. SVC Consulting, LLC Rio - Miami - Madrid - [www.svcglobal.com](http://www.svcglobal.com)*

Check out Sergio's web site - he has had quite a lot of interest on his  
Automotive Forum about the CB-26P - hitherto unknown  
in Brazil! Comments like:

"Well, I'm surprised with the  
results. After the installation,  
I made personal a road test  
and this little valve is a  
miracle. The mid RPM  
engine torque was strongly  
increased, with a lot of grip.

The sensation for the driver was like a dead body of 100 kg removed from inside the  
car! Later, we made an emission test with another wonderful surprise. Excellent figures  
added to what was already a great impression".
